

## COMPROMISE IS LIKELY IN THE SELLWOOD WILL CASE

### NEGOTIATIONS FOR A SETTLEMENT OUT OF COURT IN PROGRESS.

Duluth, Minn., June 22.—Although confirmation of persistent rumors that the Sellwood will contest case is being settled out of court, could not be had from the attorneys interested, it is believed that the differences which have arisen among the heirs of the late Capt. Sellwood will be compromised and that the contest against the will may be withdrawn this week.

A. L. Agatin, of counsel for Mrs. Ophelia Leithhead, who is contesting her father's will, claiming that the reason she was not named as a beneficiary in the instrument was due to the fact that undue influence had been brought to bear upon her father in his last illness by her brother, Richard M. Sellwood, and sister, Mrs. La Rue S. Mershon, declined to make any statement today any further than that there was "absolutely no foundation for the rumor," the rumors being that the case had been settled. Attorney C. O. Baldwin, who represents R. M. Sellwood and his sister, who are seeking to uphold the contested will, would not commit himself when asked concerning the settlement. "All that I can say is that the contest of Mrs. Martha Sellwood, widow, against the will has been settled," said Mr. Baldwin. At this time, he stated, the terms of this settlement would not be given out.

The last hearing was held before Judge Gilpin last Tuesday. Since that time, the case has been adjourned daily. The reason which the attorney gave the court for continuing the case from day to day was that Mrs. Mershon was indisposed for court attendance. It is believed, however, that since Tuesday, negotiations have been under way for a settlement of the family affairs and announcement to this effect is expected in the near future from the attorneys or the principals in the contest.

### CORPORATIONS ARE FINED FOR USING ARSENIC AND LEAD IN FOOD PRODUCTS.

Washington, D. C., June 22.—The accidental presence of arsenic in jelly, candy and chocolate and of lead in cream tartar, has caused one corporation to be fined \$100 and three corporations to be fined \$50 each for the shipment of such adulterated products in interstate commerce. In every case the arsenic and lead appear to have found their way into the products through either ignorance or carelessness on the part of the manufacturer. In order to protect himself, he should have procured materials guaranteed by his vendor under the Food & Drug Act, thus shifting the responsibility from himself, or else made certain by a personal investigation that they contained no injurious ingredients.

### ENTIRE BRITISH NATION PAYS HONOR TO KING GEORGE.

London, June 22.—The birthday anniversary of King George was officially observed today in every part of the world where flies the British flag. The royal salute was fired at all the military and naval stations throughout the United Kingdom and in London the day was observed by a general closing of all the public offices. The actual date of his Majesty's birthday was June 3, when he attained the age of 49 years.

### Upper Peninsula

**Will Head Ironwood Schools.**  
Ironwood—E. T. Duffield, of Chehalis, Wash., has been hired by the board of education as superintendent of the public schools of Ironwood for the year 1914-15.

**Ironwood's Telephone Building.**  
Ironwood—Bright prospects for the future growth of Ironwood are seen in plans of the Michigan State Telephone company to improve and enlarge its facilities. A modern exchange, equipped with the latest improved type of switchboards, will be built this year. The proposed improvements will cost \$10,000. The office will serve subscribers in both Ironwood and Hurley. The telephones now in use will be replaced by crankless instruments. The office will be a modern two-story structure of brick. It will be of colonial design, with stone column doorway and iron balconies in front of the second story windows. On the first floor will be the public reception room, commercial office and the quarters of the wire chief. The huge batteries and power plant will be in the basement. The switchboards will be installed on the second floor. One of the attractive features of the office will be the rest room for the operators, which will be found on the second floor. The room will be furnished with easy chairs, couches and other accommodations. The new switchboards will be of common battery type. Those in use at present are known as magnetic switchboards. The essential difference between the two types is indicated by the methods of calling "central." The magnetic telephone has the ringing call. Before deciding to enlarge the plant the Michigan State company made a study of the city's growth, including planned improvements to property and the expected increase in population. The new switchboards will have capacity to serve 1,300 subscribers. Seventy-five new subscribers were added last year. At the present rate of growth there will be more than 1,200 telephones in use by 1917. At present more than 1,000 telephones center in the Ironwood office. Of these 250 are in Hurley. An average of 10,000 calls are handled daily. The contract for the erection of the building was recently awarded to Owens & Nieuwenkamp, Ironwood contractors, who work under way.

# Mill End Sale

## OPENS TOMORROW -- OFFERING VALUES IN THE EXTREME

SPECIALS AND EXTRA SPECIALS IN COTTONS, LINENS, WASH GOODS AND READY-TO-WEAR FOR MEN, WOMEN AND CHILDREN.

The tremendous selling this season through our Wash Goods, Dress Goods, Linens and Ready-to-Wear sections has, through necessity, made many odd lots, short lengths etc. These, together with some big lots of Mill Ends bought at special low prices for this big event, makes a most formidable array of desirable merchandise at prices the lowest for the year.
